

Unified name	Old iOS name	data type	Description
g_annot_highlight_clr		uint	Changes the color of highlight annots
g_annot_lock		boolean	Enable/Disable annot locked property
g_annot_readonly		boolean	Enable/Disable annot readonly property
g_annot_squiggly_clr		uint	Changes the color of squiggle annots
g_annot_strikeout_clr		uint	Changes the color of strikeout annots
g_annot_transparency		uint	Changes annotations' transparency
g_annot_underline_clr		uint	Change underline annot's color
g_annot_def_author	g_author	NSString	if valorized, will be used to set the annotation author while its creation
g_auto_launch_link		boolean	if true the link action will be performed immediately otherwise the user must click on the play button
g_case_sensitive		boolean	Enable/Disable case sensitive on searching
g_dark_mode		boolean	Changes the reader mode to dark
g_hand_signature	g_enable_graphical_signature	boolean	Enable/Disable signature annot management
g_fake_sign		boolean	Use the builtin certificate to apply the signature
g_exec_js	g_execute_annot_JS	boolean	Enable/Disable JS annot's execution
g_find_primary_color		uint	Changes the color of the selected find item
g_find_secondary_color		uint	
g_fit_signature_to_field		boolean	Enable/Disable blank space trimming in the signature bitmap (when running on iOS)
g_highlight_annotation		boolean	Enable/Disable highlighting annotation on selection
g_ink_color		uint	Changes the color of ink annots
g_ink_width		float	Changes the width of ink annots
g_line_annot_fill_color		uint	Changes line annot's fill color
g_line_annot_style1		int	Change line annot style for start point
g_line_annot_style2		int	Change line annot style for end point
g_line_annot_color	g_line_color	uint	Change line annot's color
g_line_annot_width	g_line_width	float	Change line annot's width
g_match_whole_word		boolean	Enable/disable matching whole word on searching
g_navigation_mode		int	navigation mode, 0:thumbnail view 1:seekbar view
g_oval_annot_color	g_oval_color	uint	Change ellipse annot's color
g_oval_annot_width	g_oval_width	float	Change ellipse anno's width
g_oval_annot_fill_color	g_ellipse_annot_fill_color	uint	Chages ellipse annot's fill color
g_readerview_bg_color		uint	Changes reader view's background color
g_rect_annot_fill_color		uint	Changes rect annot's fill color
g_rect_annot_color	g_rect_color	uint	Changes rect annot's color
g_rect_annot_width	g_rect_width	float	Changes rect annot's width
g_view_mode		int	Defines the view of the reader

g_render_quality	g_render_mode	int	Defines the render quality 0 : draft 1 : normal 2 : best
g_auto_save_doc	g_save_doc	boolean	Automatically save the document on close.
g_sel_color		uint	Changes the selection color
g_layout_rtol		boolean	right to left navigation (both CPU and opengl on Android)
g_sel_rtol	g_sel_right	boolean	Defines if the text selection starts from right to left or the opposite
g_sign_pad_descr		NSString	Defines description in add signature view
g_auto_scale		boolean	keep same page width or same height, depends on view mode, different scale value for each page, this same to fit_different_page_size on Android
g_thumbview_bg_color		uint	Defines thumbview background color
g_thumbview_height		int	Defines thumbview height
g_layout_zoom_level		float	zoom level for layout
g_zoom_step		float	Defines the double tap zoom step
g_thumbview_label_cobor		uint	
g_swipe_speed		float	
g_swipe_distance		float	
g_tap_zoom_level		float	
g_screen_awake		boolean	
g_paging_enabled	g_paging_enabled	boolean	
g_double_page_enabled		boolean	
g_curl_enabled		boolean	
g_cover_page_enabled		boolean	
g_readonly		boolean	
g_pdf_path	g_pdf_path	NSMutableString	
g_pdf_name		NSMutableString	
text		NSString
